

High Court rules in favor of Measure

Measure is pleased to announce that the High Court has ruled in our favor twice.

Risø, Denmark, 9 September 2026

It is with great pleasure that we can announce that the High Court has ruled in favor of Measure twice within a short period.

In March 2023 a case was brought by Greenwood Engineering before the Bailiff's Court. Greenwood Engineering alleged that Measure had copied copyright protected software, though Greenwood Engineering was not willing to show to the court the content of their alleged copyrighted software.

In May 2023, the Bailiff's Court permitted a search for evidence in a secured copy of the contents of Measure's computers.

The result of the search was provided to the parties in October 2025.

Greenwood Engineering subsequently requested a renewed search in the material secured in March 2023 from Measure's computers alleging that the expert's search results warranted such a further examination.

Against Measure's objection the Bailiff's Court initially permitted further examination but was overruled by the High Court in a decision issued on 4 June 2026, as pleaded by Measure. The High Court returned the case to the Bailiff's Court with the instruction that it should close the matter. Measure was awarded costs to be paid by Greenwood Engineering.

The Bailiff's Court thereafter closed the case, while confirming that the bank guarantee issued by Greenwood Engineering in favor of Measure, is upheld until the civil case pending between the parties has come to a conclusion.

Greenwood Engineering in turn appealed the Bailiff's Court's decision, asking the High Court to look at the case again. This resulted in yet another ruling in favor of Measure issued on 21 August 2026. In such ruling, the High Court confirmed the Bailiff's Court's decision to close the case, and Measure was once again awarded costs to be paid by Greenwood Engineering.

Measure has never used or copied Greenwood Engineering's software, nor has it misappropriated Greenwood Engineering's trade secrets. Accordingly, Measure expects to prevail in the civil case mentioned, where Measure has filed a significant counterclaim.

The proceedings unfortunately gave Greenwood access to materials containing some of our trade secrets. Any future development on their part that draws — directly or indirectly — on what they have seen will constitute a violation of our intellectual property. We will of course follow this closely and take necessary action against such violations should they happen.

Measure continues to focus on what we do best — developing and delivering the best possible solutions for precise, reliable pavement assessment to our clients and partners around the world.

If you want to know more about the case please do not hesitate to contact Lasse (lh@measureroad.com) or Kaare (ksj@measureroad.com), however we would much rather discuss how we can provide you with great deflection measurement technology.
